WIRE WEAVING DINXPERLO

Optimal wildlife experience

Aviaries fulfill two important needs: they make comfortable and safe natural environments for animals and offer the best possible wildlife experience for humans. The first thing to do when fulfilling these needs involves selecting the perfect wire mesh. Suitable openings help to keep wildlife inside, while keeping out unwanted dangerous animals. The quality of the wire and the selected finishing play a role in offering clear views for spectators.

Woven and welded aviary wire mesh

With many impressive reference projects in European Zoos and private gardens, Wire Weaving Dinxperlo has proven to be an expert in aviaries. We work closely with clients and architects to create high quality aviaries with a unique design. These aviaries are appreciated by people as well as animals. Our top quality animal mesh does not feature sharp edges or harmful plastic coatings. An optional high quality black powder coating helps to create the best possible experience for visitors, while making aviaries an enjoyable place to be for wildlife.

Product	Woven and Welded Wire Mesh.
Application	Large aviaries.
Openings	Various precise sizes (mm) from 0.1 mm to 25 mm.
Material	Stainless Steel AISI 304L. Galvanized or UV resistant powder coating.
Wire	From 20 µm up to 3 mm.
