WIRE WEAVING DINXPERLO

Filter- and support discs for the cocoa pressing industry

To optimize the output of the cocoa press it is important to use the right combination of wire meshes that perfectly suits your presses. The cocoa mass needs to be filtered correctly and the cocoa butter needs to be transported through the mesh with extreme efficiency. Our meshes are used worldwide by leading cocoa manufacturers because of the high quality and durability.

Magnetic woven wire mesh

We produce wire meshes in high grade plain steel, as well as special magnetic stainless steel. In the past 100 years we have developed and optimized the specifications of the wire meshes for the cocoa industry. These specifications are most suitable for the pressing of the cocoa mass. We process this wire mesh to filter- and support discs suitable for all cocoa presses of all diameters. Whether you require a centered hole, a folded edge or support packs consisting of multiple layers, we can offer you all the options. All in order for you to efficiently produce a high quality cocoa product.

| | |
|--------------|--|
| Product | Magnetic woven wire mesh |
| Application | Filter- and support discs for cocoa pressing |
| Material | Stainless steel AISI 430S Plain steel |
| Properties | High durability Magnetic Produced in accordance with customer requirements |
| Delivery | Custom made discs |
| Availability | From stock |
| Quality | Top Dutch quality According to ISO 4782:1987, ISO 9044:1999 and ISO 9001 |
